EZsalt

Salt. Automated.

EZsalt Sensor

Smart salt monitoring

The EZsalt sensor is an easy-to-install Wi-Fi enabled salt level monitoring device for water softeners. This advanced device monitors your unit's salt level around the clock, displays the level in real time from the EZsalt app and alerts you when it's time to add more salt.

EZsalt Sensor

SMART SALT MONITORING

Easy installation on any brine tank
The EZsalt Sensor is small enough to fit in any brine tank and takes less than 5 min. to install.

Water & dust proof
The EZsalt Sensor is designed to ensure a reliable performance inside the humid environment of your softener.

User-friendly application
The EZsalt app offers a simple setup process, real-time monitoring and analytics.

High accuracy
The time-of-flight infrared sensor provides precise readings regardless of the salt granule size inside your softener.

Wi-Fi connectivity
The EZsalt Sensor easily integrates with home Wi-Fi networks for seamless updates and notification.

Real-time monitoring
Tracks salt levels continuously and sends alerts when levels are low.

HOW DOES IT WORK?

Our sensor features a “time-of-flight” infrared lase sensor. It simply takes a measurement between the top of the brine tank and top of the salt. It’s rated accuracy is ± 5 cm.
The time-of-flight infrared sensor provides precise readings regardless of the salt granule size inside your softener.

PACKAGE CONTENT

- EZsalt Sensor 3.0
- Snap-on mount with screw-on lid attachment
- Micro USB cable
- Wall adapter
- Card with QR code for app download

Order reference: 4824000001
