

## CONTROL INFECTION & ELIMINATE ODOUR

Perfect for use in

- › Residential care homes
- › Hospital bedrooms
- › Waiting rooms
- › Consulting rooms
- › Dentist decontamination

Improve the air quality and eliminate all odours from incontinence and medical conditions. Improve the healthcare of care home residents, staff and visitors alike. The AS20/AS20X/AS20M are completely silent using our unique thermal UV to eliminate unpleasant odours and control harmful bacteria and viruses both in the air and on all exposed surfaces 24 hours a day, 365 days a year.

The AS units are suitable for use in areas of continuous occupation in enclosed spaces which require a silent unit. There are two distinct silent models available, AS10 for smaller rooms up to 15m<sup>2</sup> and AS20 for larger rooms up to 25m<sup>2</sup>, both with X versions for high odour areas or AS20M for allergy and infection control only.

All AS units are completely silent in operation with a blue light visible through the indicator strip on the front. Units should be wall mounted as high as practical for best operation. Designed to be plugged in, with an inline switch, but can also be wired into a fused spur.
