Evolve Series[®]
Evolutionary Thinking in Water Treatment[™]

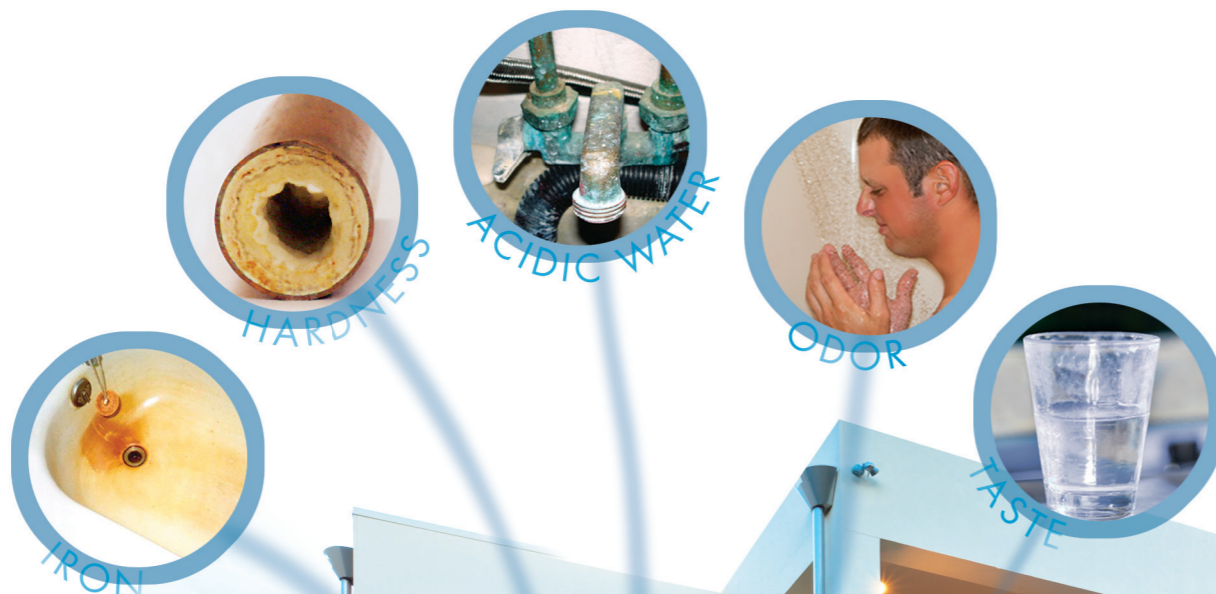

Evolutionary Thinking in Water Treatment™

A household with clean, conditioned water is a household that saves money. Quality water is water you want to drink, without the unpleasant taste and odor. Optimally conditioned water requires less detergent, shampoo and cleaners. And, household appliances and plumbing fixtures perform better, longer — so you prevent costly replacements due to hard water's damaging effects.

Every household has unique water — and individual water treatment needs. The exclusive Evolve Series® line of conditioners is designed to target and solve the specific water problems you experience in your home. Whether you are a municipal water customer or use a well, there is an Evolve Series system with the solution for your water problem, including:

- Iron: rust buildup on fixtures
- Hardness: deposits in pipes and water-using appliances
- Acidic water: corroded plumbing
- Odor: sulfur, chlorine or other smells
- Taste: iron, chlorine and various minerals

All authorized Evolve Series dealers are carefully evaluated, selected and certified, so you can be certain that you're getting the right water treatment for your family's needs. Evolve Series systems are not only reliable and easy-to-use, they are built in the EU., and are sold and serviced by factory trained dealers across the country.

Smart Controller Ensures Smooth Operation

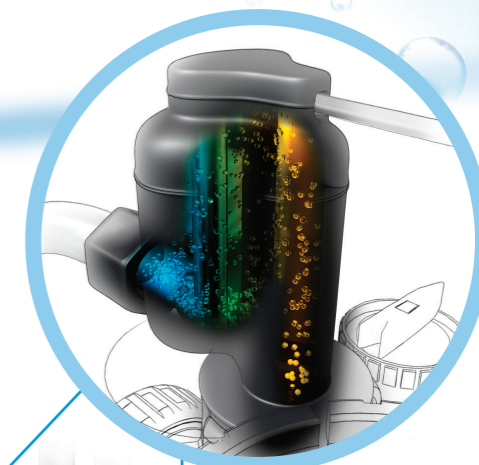

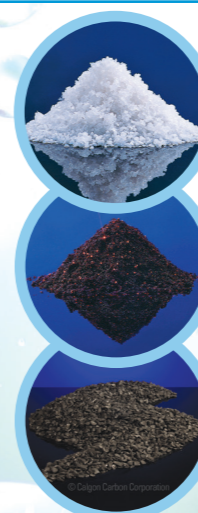

- Regenerates only when necessary — no wasted salt or water
- Visual and audio alerts tell you when salt is low
- When service is needed, alarm displays dealer name and phone number
- Battery back-up stores all settings during power outages
- Convenient money-saving Vacation Mode setting
- Records history of salt and water used

Reliable, Trouble-Free Design

- Exceptionally smooth and ample water flow
- Minimizes water pressure drops
- Simple — only one moving part

High-Performance Water Conditioning Media

- Exclusive Crystal-Right™ media effectively corrects hardness, iron, manganese and pH problems
- The Crystal-Right CR100 media, in combination with the chlorine generator, will also remove ammonia
- Crystal-Right in combination with the Min-Plus media will efficiently remove rotten egg odors commonly associated with hydrogen sulphide
- A variety of other medias are available to solve your specific water problems

Unique Self-Sanitizing Feature Destroys Bacteria

- Disinfects media bed
- Helps keep internal system clean and germ-free
- No special additives or ingredients required

Low-Maintenance Brine Tank

- With soft water refill, keeps itself clean automatically
- Heavyweight corrosion-free material
- Safety float prevents overflow

System shown with optional tank jacket and salt grid.
