TAP WATER WITH GREAT TASTE

HOME WATER KIT

TAP WATER WITH GREAT TASTE

The Home Water Kit transforms your tap water by improving taste and odor while helping to reduce sediments, PFAS, microplastics, heavy metals, and other unwanted contaminants.

WHY TAP WATER

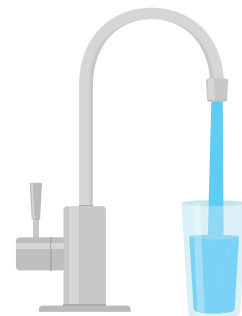

First of all, drinking tap water is a very simple way to reduce your eco- logical footprint and take care of our planet. By installing 1 filter at home you replace up to 10 000 plastic bottles. Because tap water is deliv- ered directly to your home, you no longer have to lug around bottled water and garbage bags. And last but not least, tap water is good for your wallet.

FRESH AND GOOD TASTE

The Home Water Kit assures high-quality, fresh and good tasting drinking water. The cartridge removes polluting elements, odors and off-tastes from your tap water, but preserve natural minerals. In this way, the filters turn your tap water into a natural source of drinking water.

CONVENIENCE

With a simple installation, you connect the filter to the existing water pipe so no additional faucet is needed. The kit requires limited maintenance, as the cartridge only needs to be replaced once a year. Enjoy 100% fresh and good tasting water, straight from your own tap.

REMOVES IMPURITIES AND REDUCES PFAS & MICROPLASTICS

The Home Water Kit improves the quality of your tap water by reducing unpleasant tastes and odours, as well as contaminants such as PFAS, microplastics, heavy metals, and pesticides. It transforms your tap water into a cleaner, fresher source of drinking water. In addition, filtered water enhances the flavour and aroma of coffee, tea, and other beverages, allowing you to enjoy every drink to its fullest.

ECO-FRIENDLY

The Home Water kit is an ecological and convenient alternative to bottled water. By installing the filter at home, you help eliminate up to thousands of plastic bottles that are transported through our streets every day, which in turn reduces greenhouse gas emissions.

GREAT PERFORMANCE

The attractive and elegant design of the Home Water Kit Cartridge goes hand in hand with its great performance. When you install the filter, there is hardly any pressure loss. In addition, the good flow rate of your tap water is maintained.

USER-FRIENDLY

With Home Water Kit you get fresh and clean water straight from your tap. The kit is installed on your existing kitchen faucet. Just replace the cartridge once a year. On top of that, you don't have to lug around bottled water anymore and you save money.

ULTRA CARTRIDGE

The Ultra Cartridge improves the taste and odour of your drinking water through effective dechlorination and purification. With its 0.2 micron filtration, it reduces PFAS and microplastics, delivering cleaner and better-quality drinking water. The filter needs to be replaced at least once a year, depending on its capacity.

- Improves the taste and odour of your drinking water
- Dechlorination and purification of drinking water
- Reduces PFAS
- Reduction of microplastics
- Reduces heavy metals
- 0,2 micron filter
- Reduces pesticides

TECHNICAL SPECIFICATIONS

MEDIUM

Flow rate	5l/min
Capacity*	23 000L
Working pressure	Min. 2 – Max. 6 Bar
Temperature	Min. 4 Max. 30°C (40-86°F)

* Capacities and flow rates may vary depending on the quality, pressure, and flow of the incoming water.

DIMENSIONS

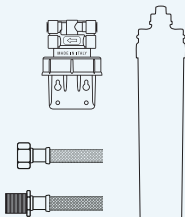

MEDIUM

Diameter	8,74 cm
Height (without head)**	38,5 cm
Height (with head)**	41,7 cm

** When installing and replacing the kit, consider the space required to remove the cartridge.
